7.1.2. The Institution has facilities and initiatives for 1. Alternate sources of energy and energy conservation measures 2. Management of the various types of degradable and non-degradable waste 3. Water conservation 4. Green campus initiatives 5. Disabled-friendly, barrier free environment

7.1.2 Index

No.	Particular
1.	Alternate sources of energy and energy conservation measures
	• Use of LED bulbs/ power efficient equipments
2.	Management of the various types of degradable and non-degradable waste
	• Solid Waste Management
	• Liquid Waste Management
	• E-Waste Management
	• Waste Management Policy
3.	Water Conservation
	• Rain water harvesting
	• Bore well recharge
	• Water conservation policy
4.	Green Campus Initiatives
	• Limited use of plastic
	• Green Campus Policy
5.	Disabled-friendly, barrier free environment
	• Ramp on ground floor

Energy conservation measures are crucial for reducing energy consumption, mitigating climate change, and enhancing energy security. Renewable energy sources such as solar, wind, hydro, geothermal, and biomass offer sustainable alternatives to non-renewable fossil fuels. Energy-efficient technologies like LED lighting, smart lighting systems, and energy-efficient appliances also contribute significantly to energy conservation.

Energy conservation policies and incentives such as tax credits, rebates, net metering, renewable portfolio standards, and energy efficiency standards encourage adoption of energy-efficient technologies. Emerging technologies like

smart grids, energy storage systems, and advanced lighting technologies further support energy conservation efforts.

Effective energy conservation measures yield numerous benefits, including reduced energy consumption, cost savings, environmental benefits, improved energy security, and enhanced energy independence. However, challenges like energy poverty, climate change, and energy security require continued innovation and research and development.

Degradable Waste:

Degradable materials are substances that break down naturally over time, typically through biological, chemical, or physical processes. Examples include food waste, paper, cotton, wood, and bioplastics. These materials can decompose into harmless components, returning nutrients to the environment. In contrast, non-degradable materials resist decomposition and remain intact for extended periods .

1. Organic waste: food scraps, fruit peels, vegetable waste
2. Paper products: newspaper, cardboard, paper bags
3. Textiles: cotton, wool, silk
4. Human waste: feces, urine
5. Yard trimmings: leaves, grass clippings
6. Food waste: bread, grains, eggshells

Non-Degradable Waste:

Non-degradable materials include plastics, synthetic fibers, metals, glass, and ceramics. They contribute to pollution, waste accumulation, and environmental harm. Proper management and disposal of both types are crucial. Degradable materials should be composted or recycled when possible. Non-degradable materials should be reused, recycled, or disposed of through established waste management systems.

1. Plastics: polythene bags, plastic bottles, microbeads
2. Glass: bottles, windows, mirrors
3. Metals: aluminum cans, steel, copper
4. Electronic waste: computers, phones, batteries
5. Hazardous waste: chemicals, pesticides, paint
6. Nuclear waste: radioactive materials
7. Synthetic materials: nylon, polyester, spandex

Electronic waste (e-waste) management is a critical issue globally, as the rapid obsolescence of electronic devices has led to an alarming rate of waste generation. E-waste includes discarded computers, smartphones, televisions, appliances, and other electronic devices that contain hazardous materials like lead, mercury, and cadmium. Improper disposal of e-waste contaminates soil, water, and air, posing severe environmental and health risks.

Governments and organizations are implementing policies and initiatives to tackle e-waste. For instance, the Extended Producer Responsibility (EPR) principle makes manufacturers accountable for waste management. Some countries have established take-back programs, collection centers, and recycling targets.

Waste Management Policy
Chandrabhama Mahavidyalay Arts and Science

1. Summary

This document outlines the Waste Management Policy for Chandrabhama Mahavidyalay Arts and Science. The policy focuses on minimizing both solid and liquid waste, enhancing segregation, collection, transport, safe disposal, recycling, and wastewater treatment. It includes a comprehensive approach towards managing various waste types, including domestic, institutional, recyclable materials, e-waste, and hazardous waste, while emphasizing Co-friendly technologies like composting and waste-to-energy systems.

2. Waste Management Policy Statement Chandrabhama

Chandrabhama Mahavidyalay is committed to managing waste produced across its campus in an environmentally safe and cost-effective manner, adhering to relevant environmental legislation. The college will comply with waste management regulations as prescribed by the local municipal authorities.

3. Scope

This policy applies to all solid (including paper, plastics, e-waste, hazardous waste) and liquid waste generated on campus. It encompasses all students, faculty, staff, and visitors.

4. Introduction

This policy is part of Chandrabhama Mahavidyalay's strategic plan, aiming to ensure effective waste management that minimizes environmental impact. The objectives include maintaining cleanliness, promoting recycling, and fostering a sustainable campus environment.

5. The Waste Hierarchy

The college will implement waste management strategies based on the following hierarchy:

- 1) Waste Minimization at Source
- 2) Effective Segregation at Source
- 3) Waste Recycling
- 4) Waste to Composting
- 5) Waste-to-Energy
- 6) Waste Disposal

AISHE - C59888

6. Plastic Waste Reduction

Recognizing the detrimental effects of plastic waste, the college will implement initiatives to reduce plastic use :

- 1) Replace single-use plastics in catering with compostable alternatives
- 2) Provide reusable cups and promote their use on campus
- 3) Install water coolers to encourage the use of reusable bottles.

7. Policy Targets 2018 By 2023, Chandrabhama Mahavidyalaya aims to:

- 1) Safely dispose of all solid and liquid waste.
- 2) Eliminate single-use plastics on campus.
- 3) Ban the sale of plastic bottled water.
- 4) Establish proper e-waste management protocols.
- 5) Treat wastewater for horticultural use.

8. Roles and Responsibilities

- 1) Department Heads: Ensure proper waste segregation and compliance within their departments
- 2) Class Representatives: Promote cleanliness and report issues.
- 2) Students: Maintain cleanliness and properly segregate waste.
- 4) Maintenance Personnel: Facilitate waste management logistics.
- 3) Waste Generator: Follow waste segregation and disposal guidelines.

9. Operational Methodology

Primary Collection

- 1) Implement source segregation of waste.
- 2) Establish a three-bin system for waste collection.
- 3) Facilitate door-to-door collection from campus facilities.

Secondary Collection

- 1) Provide secondary storage for recyclable materials.
- 2) Enable easy access for waste pickers and recyclers.

Transportation of Waste

- 1) Ensure safe transportation of segregated waste.
- 2) Process organic waste on-site where feasible.

Wastewater Management

- 1) Construct infrastructure For Wastewater collection & treatment
- 2) Reuse treated effluent for campus landscaping

❑ WATER CONSERVATION

The College has installed Rainwater harvesting project; the rain water falling on the terrace is used to increase underground water table. Water conservation is crucial for ensuring the sustainable management of the world's most precious resource. With the global water crisis intensifying, effective conservation measures are essential to protect this limited resource. Simple yet impactful changes can make a significant difference, such as fixing leaks, installing low-flow fixtures, and using dual-flush toilets.

Governments and organizations implement policies and initiatives to promote water conservation. Water-saving appliances and efficient irrigation systems are incentivized through rebates and tax credits. Public awareness campaigns educate consumers on responsible water usage.

Effective water conservation strategies include:

- Efficient appliances and fixtures
- Rainwater harvesting
- Greywater reuse
- Drip irrigation
- Water-efficient industrial processes
- Public education and awareness

WATER CONSERVATION POLICY

Preamble : The policy document for water conservation in the institute

Objective :

- Increase the efficiency in water use and reduce the wastage of water.
- Conserve and recycle the water
- Create awareness about water conservation among staff and students

Policy :

1. To collect and store rain/stormwater of the college campus in the water bodies
2. Take preventive measures to avoid water pollution stored in water bodies .
3. Take initiative to create awareness regarding water conservation
4. All water supply lines taps, and other fixtures in the washroom and toilet blocks should be checked and repaired periodically to avoid unhygienic conditions
5. Maintain the water bodies by periodic maintenance .
6. Wastewater used for maintaining the landscape, outside road-floor cleaning and watering trees and plants .

❑ GREEN CAMPUS INITIATIVES

Limited use of plastic :

To mitigate the detrimental impact of plastic waste, colleges worldwide are implementing measures to reduce plastic usage. Initiatives include banning single-use plastics, promoting reusable bags, containers, and water bottles, and installing refillable water stations. Colleges are also transitioning to digital materials, reducing paper waste and encouraging faculty and students to adopt sustainable practices. Additionally, recycling programs and composting facilities are being established to minimize waste sent to landfills.

✦ Conduct waste audits and assessments .

- Engage students, faculty, and staff .
- Implement recycling and composting programs .
- Offer incentives for sustainable practices .
- Collaborate with local communities .

✦ Benefits of limiting plastic use in colleges:

- Reduces plastic waste and pollution
- Conserves natural resources
- Promotes sustainable lifestyle habits
- Encourages innovation and creativity
- Supports campus sustainability goals

Proper Parking During Exams

This is to inform all students, faculty, and staff that during the examination period, it is mandatory to park vehicles in an organized manner in the designated parking area. Proper parking is essential to avoid congestion and ensure a smooth flow of traffic during exams.

Please follow the instructions of the parking attendants and avoid parking in unauthorized spaces. Your cooperation is crucial to maintaining order on the campus during this busy period.

Ref No:

Ban on Use of Plastic

In line with environmental conservation efforts and government regulations, the use of plastic bags and disposable plastic items is strictly banned on the college campus with immediate effect. All students, faculty, and staff are encouraged to use eco-friendly alternatives such as cloth bags, metal or glass containers, etc.

Violators of this policy will face disciplinary action. Let's work together to create a cleaner and greener environment.

Landscaping with Trees and Plants

We are pleased to announce that the college will be initiating a landscaping project to enhance the greenery and beautify the campus environment. The project will involve planting trees and plants around the college premises.

All students and staff members are invited to participate in this initiative by contributing to the planting activity, which will take place on 20/08/2018. Let's make our campus more eco-friendly and visually appealing.

Water Conservation Policy

Preamble : The policy document for water conservation in the Institute.

Objective :

- 1) Increase the efficiency in water use and reduce the wastage of water.
- 2) Conserve and recycle the water.
- 3) Create awareness about water conservation among staff and students.

Policy :

1. Collect and store rain/stormwater of the college campus in the water bodies.
2. Take preventive measures to avoid water pollution stored in water bodies.
3. Take initiatives to create awareness regarding water conservation.
4. All water supply lines, taps, and other fixtures in the washroom and toilet blocks should be checked and repaired periodically to avoid wastage of water.
5. All sewage lines should be checked and repaired periodically to avoid unhygienic conditions.
6. Maintain the water bodies by periodic maintenance.
7. Wastewater used for maintaining the landscape, outside road-floor cleaning, and watering trees and plants

DISABLED-FRIENDLY, BARRIER FREE ENVIRONMENT

Creating a disabled-friendly, barrier-free environment requires a holistic approach that addresses physical, sensory, and cognitive accessibility. This includes designing buildings and public spaces with ramps, elevators, and wide pathways to facilitate easy navigation. Adapted restrooms, facilities, and parking areas ensure equal access to essential services.

Incorporating assistive technologies like voice-controlled systems, screen readers, and closed captions enhances digital accessibility. Providing sign language interpretation, assistive listening devices, and personal assistance ensures inclusive communication. Implementing universal design principles in urban planning and architecture promotes seamless integration.

Educational institutions can foster inclusivity by offering disability support services, adaptable curriculum materials, and accessible digital resources. Businesses can benefit from disability-inclusive hiring practices, employee support programs, and accessible customer services.

Governments play a crucial role in enforcing disability rights legislation, providing funding for accessibility initiatives, and promoting inclusive urban planning. Public awareness campaigns and community engagement strategies help break down social barriers and stigma.
